

The CAP26 roadmap in detail for ER Hospitality

Strategic priorities	Impacts	Objectives	Progress as at 30 June 2025	Progress as at 30 June 2024	Impact zones
Enhancing the interaction of visitors with the natural and cultural landscape	Enables guests to enjoy a unique and authentic experience immersed in a regenerative and health-focused stay, driven by enrichment of biodiversity, expansion of natural areas, and the preservation and enhancement of cultural heritage.	Create a marine education centre in Bel Ombre		The Centre became operational in December 2024 with two dedicated marine biologists and has welcomed around 4,500 visitors	 Biodiversity
		Develop new visitor experiences centred on ecosystem restoration projects at the Heritage Marine Education Centre	Design of the Centre with the aim of strengthening education and awareness of marine ecosystems	Four guided tours have been designed and offered by the Heritage Marine Education Centre, highlighting ecosystem regeneration initiatives and raising visitors' awareness of issues relating to local biodiversity	
		Establish a coral reef restoration programme in the Bel Ombre lagoon	Start of collaboration with Reef Conservation to protect the coastal zone: restoration of seagrass beds and coral reefs at Bel Ombre	The restoration programme has been temporarily suspended due to external constraints relating to stakeholders; alternative approaches are being explored	
		Develop the concept of the Bel Ombre nature reserve in partnership with recognised organisations	A feasibility study assessed the potential for a voluntary marine conservation area at Bel Ombre; inconclusive results, to be reviewed	An initial assessment has been launched to explore opportunities for terrestrial biodiversity conservation within the Bel Ombre Nature Reserve	
		Have the Bel Ombre nature reserve recognised as a carbon sink	Partnerships identified to develop and implement carbon capture and sequestration projects.	A preliminary assessment of carbon sequestration potential has been carried out with a specialist consultant. A roadmap is currently being developed	 Energy transition
